

**Win Shine Glass**

**Mirror & Glass Solutions for Bathroom & Interiors**

## About Win Shine

Founded in 2006, Win Shine specializes in mirror and glass solutions for bathroom and interior applications, working with brands and distributors across Europe, Australia and North America.

We believe reliable products are achieved through continuous refinement — improving details over time to ensure consistency and long-term performance.

Guided by practical engineering thinking, we combine stable manufacturing experience with ongoing product improvement, supporting lasting cooperation built on reliability and trust.

## Why Work With Win Shine

- **Detail-Driven Quality**

A refinement-focused approach helps reduce common quality risks and ensures consistent long-term performance.

- **Smooth Product Development**

We help turn new ideas into reliable, production-ready products.

- **Predictable Supply**

Stable manufacturing ensures consistency across batches and ongoing projects.

- **Easy & Reliable Cooperation**

Clear communication and flexible support make collaboration straightforward and dependable.

## LED Bathroom Mirror

Designed for modern bathroom environments, combining refined illumination, practical functionality and dependable long-term performance.

- Uniform and comfortable illumination
- Detail-focused processing for consistent quality
- Adaptable designs for diverse market needs
- Suitable for residential and hospitality projects

Integrated acrylic diffusion creates smooth, continuous lighting with soft visual comfort for contemporary interiors.

A refined front-lit mirror delivering balanced illumination with a clean architectural look, ideal for daily grooming and modern bathroom spaces.

Layered sandblasted lighting combined with a subtle side-frame profile creates depth and a refined architectural look.

Timeless frameless design with perimeter lighting, providing even illumination without dark corners.

## Shower Glass & Enclosures

Designed for modern bathroom spaces, combining clean architectural aesthetics with reliable performance and practical everyday usability.

- Minimal and refined glass appearance
- Durable tempered safety glass construction
- Smooth operation and stable structure
- Suitable for residential and hospitality applications

## Switchable Smart Glass

Instant privacy control through electrically switchable glass, allowing spaces to transform between transparency and opacity when needed.

- Instant transition between clear and opaque states
- Privacy without curtains or additional partitions
- Maintains natural light and spatial openness

Office Partition

Hotel Bathroom Partition

Skylight Glass

## Insulated Blind Glass

Integrated blinds sealed within insulated glass units, offering adjustable privacy and light control while maintaining a clean architectural appearance.

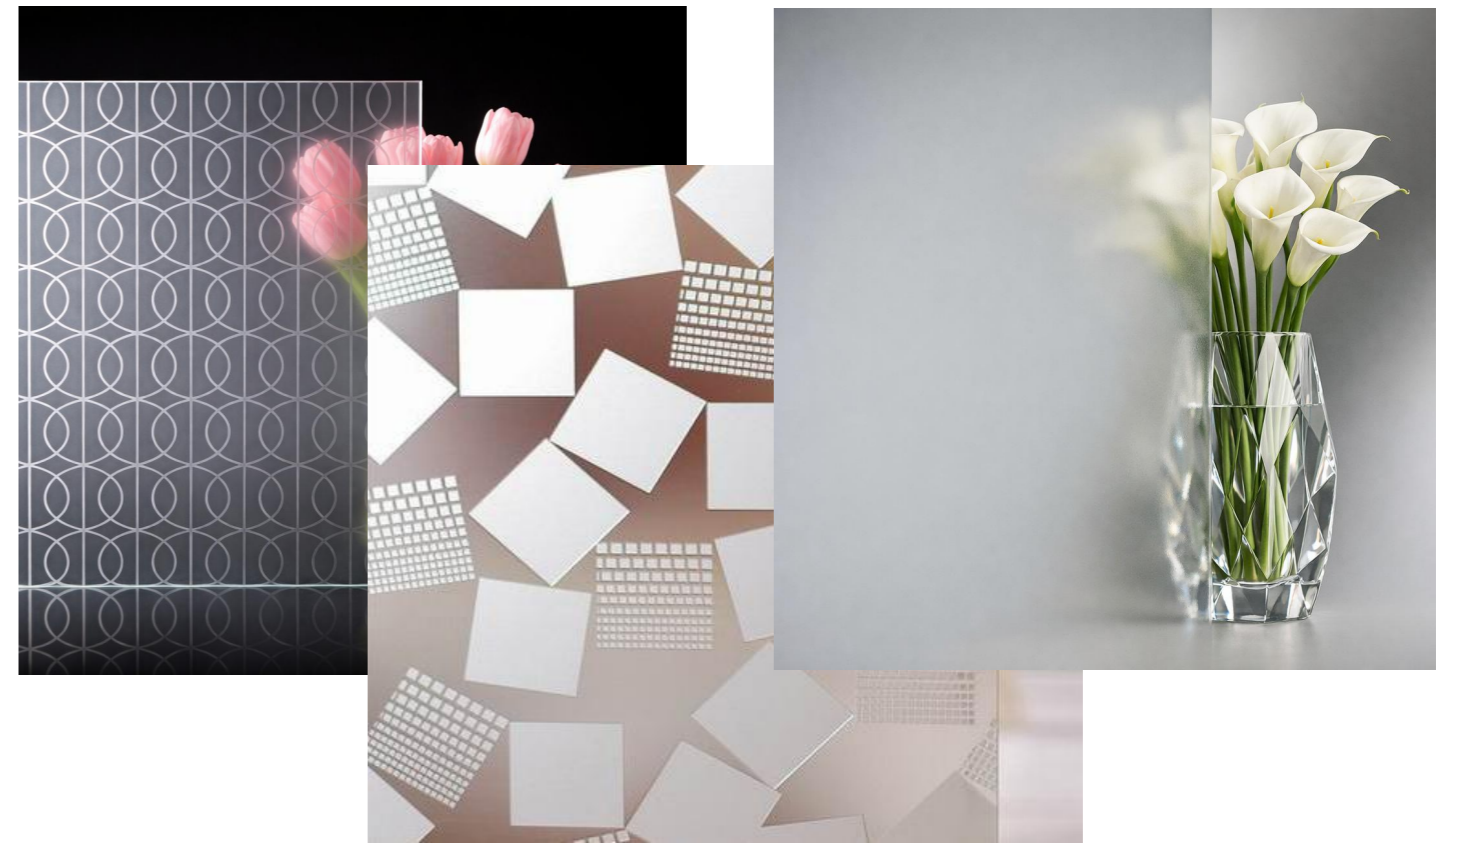

- Adjustable light and privacy control
- Blinds protected inside sealed glass units
- Low maintenance and dust-free design
- Suitable for partitions and windows

## Wired Glass

Glass with embedded mesh offering privacy and architectural character.

## Frosted Glass

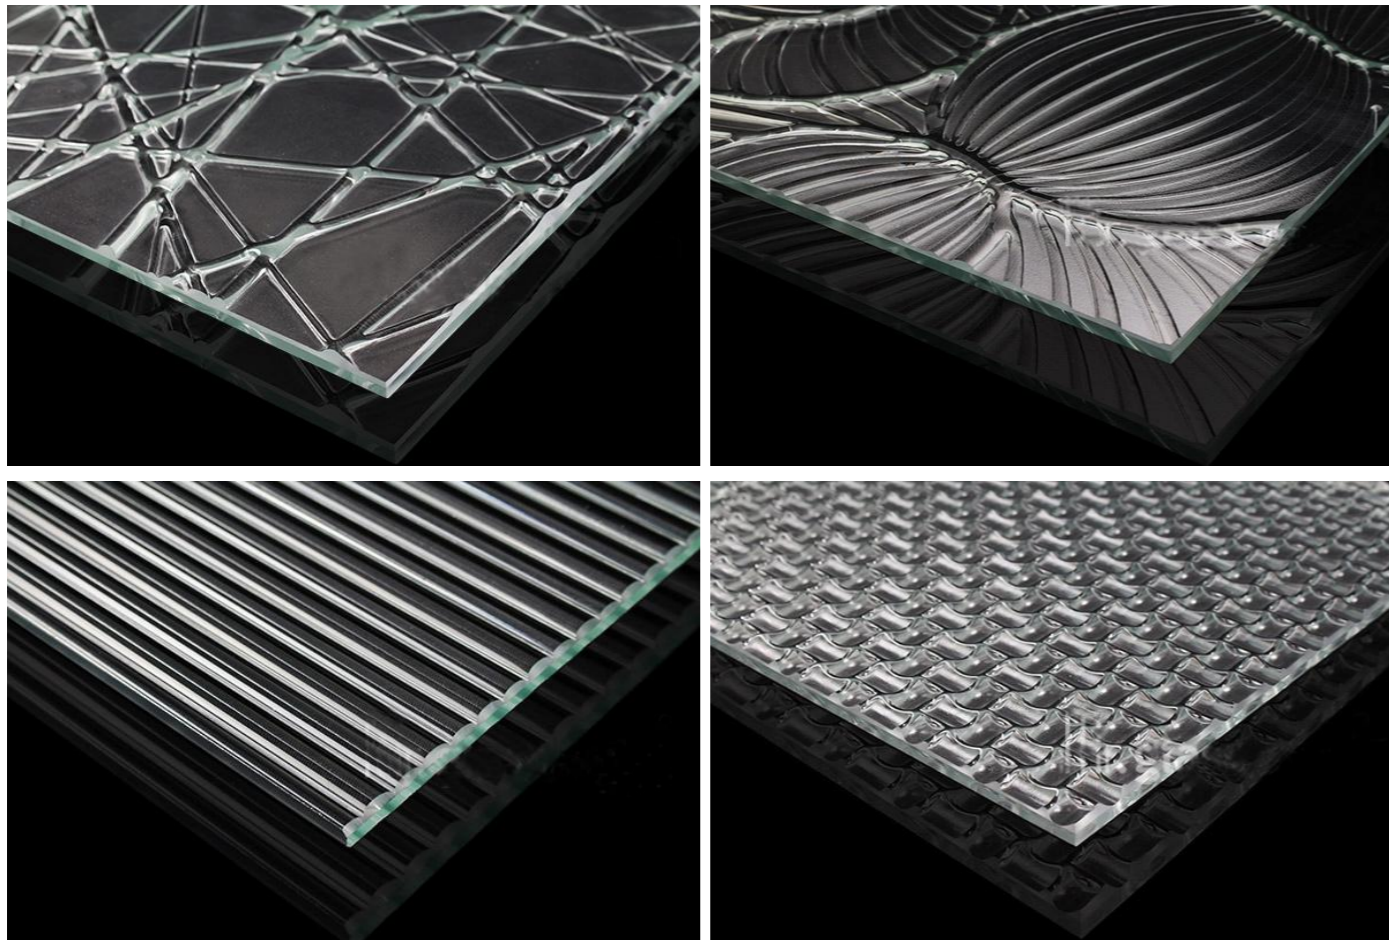

Soft translucent finish providing privacy while allowing light flow.

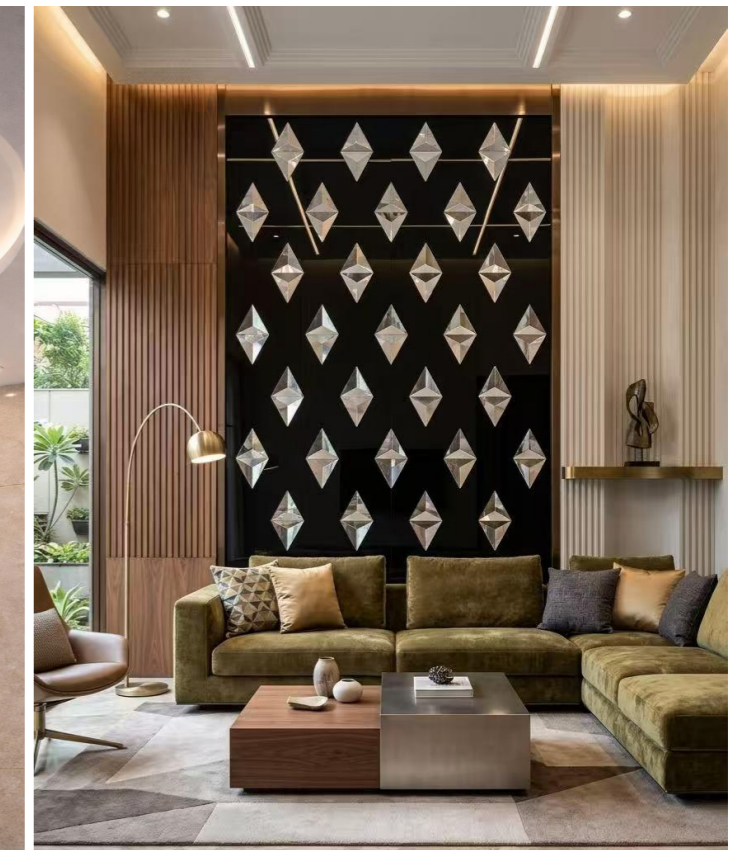

## Decorative textured glass

Decorative textured glass offering varied surface patterns that diffuse light softly while adding depth, privacy and visual character to interior spaces.

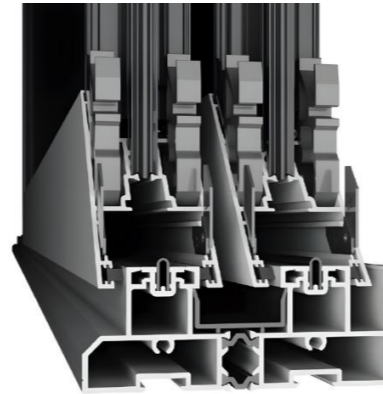

## Bevelled Decorative Mirrors

Precisely cut bevelled mirror panels create elegant reflections and decorative depth, adding a refined visual accent to interior spaces.

## THERMAL BREAK ALUMINIUM WINDOWS & DOORS

Designed for luxury residences and commercial projects, thermal break aluminium windows and doors combine strong insulation, airtight sealing and reliable weather resistance to improve comfort and reduce energy loss. With slim profiles, customisable finishes and low-maintenance durability, they offer a refined balance of performance and aesthetics.

● High quality hardware

● EPDM insulation strip & Full circle well sealed

● System mosquito screen
